Online Histology Made Easy Slides Atlas | MedicForYou

Histology is the study of the microanatomy of cells, tissues, and organs as seen through a microscope. It examines the correlation between structure and function. Histology Guide teaches the visual art of recognizing the structure of cells and tissues and understanding how this is determined by their function. Rather than reproducing the information found in a histology textbook, a user is shown how to apply this knowledge to interpret cells and tissues as viewed through a microscope.

Histology Made Easy: The cell membrane; Semi permeable ...

Bone is perhaps one of the easiest connective tissues to identify. The matrix in bone is made up of calcium salts that have been deposited on collagen fibers. The result of this deposition in dense bone is the formation of layers of matrix often in concentric rings (part of a structure called the osteon). Like cartilage, bone has lacunae.
