Problems can occur when printing at such high-speed rates. For example, if the printer is running unattended, the integral dryers may not keep up with the take-up system. Recognizing this problem, Seiko offers an optional, add-on dryer that connects to the printer's front (Fig. 6). The dryer, which costs approximately \$3,500 and requires 200 to 220V of power, can keep up with the printer and take-up system, even while printing at 176 sq. ft./hr.
